July 12, 2011

Hello,

I have faxed 4 pages consisting of a copy of, "Request for a Formal Investigation" and a copy of your Patriot Act statute concerning Section 215. Please provide me with a progress report about the investigation into Tyson Foods, the USDA, EEOC, US DOL, OSHA and other agencies violating section 1107 and the American Recovery and Reinvestment Act. I duly reported Tyson Foods for violating laws related to their USDA contracts under the ARRA. By law you are required to investigate and take appropriate action. Please inform me of any and all actions you have taken – if any. The federal courts and the U S Department of Justice have a bias to allowing Tyson Foods to violate laws even if it kills U S citizens. Please obey the law and prosecute Tyson Foods and the others.

My email, U S mail and internet are all being tampered with thereby obstructing my ability to obtain witnesses, report law violations or contact persons related to my legal matters. Pursuant to Section 215 this conduct is forbidden and illegal. It clearly states, "Investigations must also not be performed on U S Citizens who are carrying out activities protected by the First Amendment to the Constitution of the United States." I also have a right to contact the media about your illegal activity. Will you please stop interfering and obstructing my 1st Amendment rights to pursue legal redress? Please inform me by what authority you have to tamper with and obstruct justice?

Would you please show good faith with a response?

Kindly,

Dale B Adams

Case No.09-3054

REQUEST FOR A FORMAL INVESTIGATION

Thomas J. Browne; FBI SAIC
Fayetteville Resident Agency
75 N. East Avenue, Suite 201.
Fayetteville, AR 72701

December 29, 2010

Hello,

On the date of October 29, 2009 I sent you a request for a formal investigation. [Exhibit A] In this letter I described how numerous federal law enforcement agencies were violating the law to protect Tyson Foods from criminal charges. That included the EEOC, U S DOL, OSHA and USDA who sabotaged my valid civil rights claims or alleged crimes. This letter had the following paragraph,

“You will also find numerous letters and email transmissions sent to the USDA Food Safety Inspection Service related to filing charges against Tyson Foods Inc for their blatant disregard for food safety regulations and U S laws. Although I have received a few responses from the FOIA office, I haven't heard from the FSIS department about this investigation or if they are even pursuing this important matter.”

I received a call from a kind FBI agent named David Blakely. He informed me that the FBI didn't have jurisdiction and advised me to contact the USDA, Office of Inspector General which I did. The USDA OIG ignored our claims and even failed to properly address our FOIA requests, deliberately concealing proof of Tyson Foods food safety, as well as other serious law violations. Although they had jurisdiction under the American Recovery and Reinvestment Act, they failed to abide by this law.

I have become aware of the American Recovery and Reinvestment Act. It appears that the EEOC, U S

DOL, OSHA and USDA all violated the law in order to protect Tyson Foods from losing federal contracts under the ARRA and federal contracts in general. Tyson Foods received about 500 million dollars of federal contracts in 2009 alone pursuant to GAO report 10-1033, September 2010. The FBI does have jurisdiction over these matters since it is **fraud related to public corruption** specifically being, **Economic Stimulus Fraud/Corruption**. Tyson Foods obtained 3 federal contracts under the ARRA. On 04/30/2009 Tyson Foods received \$1,627,959.96 from the USDA, contract # 120298208. On this same date, 04/30/2009 Tyson Foods took me to their physician to attend to my hand injuries they deliberately caused violating Title VII anti-retaliation laws. On 06/01/2009 Tyson Foods received \$1,290,366 from the USDA, contract # 120298208. One day later on 06/02/2009, I was wrongfully terminated from Tyson Foods for job abandonment. On 09/23/2009 Tyson Foods received \$1,085,163 from the USDA, contract # 120298403. On the date of 09/21/2009, I was reporting Tyson Foods and their numerous food safety violations to the USDA which was to no avail, and the USDA refuses to comply with my FOIA requests to determine if they even investigated my claims at all.

Source: <http://www.recovery.gov/Pages/TextViewProjSummary.aspx?data=recipientAwardsList&AwardType=CGL&RecipName=TYSON%20FOODS,%20INC>.

Adams v. Tyson Foods cause # 09-3054 has a tremendous amount of evidence of serious violations of law by the USDA, U S DOL, OSHA and the EEOC. I have filed a FOIA complaint against both the USDA cause # 10-3120 and U S DOJ cause # 10-3117 because they refuse to fulfill FOIA requests about these law violations. Substantial evidence of illegal activity is within this cause matter.

Members of my family are dying because of these law violations from public corruption. The USDA is so inhumane that they violated the law and their own regulations although we pleaded with them to abide by their rules to prevent the undue death of our unborn child. Tyson Foods federal contracts appear to be more valuable than human life. I believe these people should be charged with murder.

Would you please abide by and enforce the laws and exercise due diligence to investigate these matters to prevent any further loss of life to my family members or other employees due to this corruption?

Sincerely,

Dale B. Adams

August 31, 2009

Dear Sirs,

I have several legal disputes with Tyson Foods and agencies of the U S Government such as the USDA and the U S Department of Labor. I have been unable to locate an attorney to represent me although I have contacted about a dozen in all. Therefore I am representing myself pro se and doing the best job I can until I can find representation.

Tyson Foods deliberately injured me and violated my civil rights so I do get emotional about this matter and want justice.

The USDA allowed my wife to get a federal loan for her home but refuses to help us make repairs to make the home safe because they didn't inspect the home properly prior to closing. I am dismayed by their lack of respect for civil rights and their duty to do what is honorable so I have gotten upset about this matter.

I wrote the U S Secretary of Labor and President Obama and informed them I would file suit if they didn't resolve the matter. I spoke with a woman at HUD and she said my letter was a little threatening. I admit I am abrasive at times especially when I have been harmed. I had no intention of making any threats. I was just giving them fair warning because I do intend to uphold my civil rights.

I have written Tyson Foods trying to get them to mediate the matter and resolve it out of court but they continue to make ethics violations and break laws trying to evade the matter. In my attempts to mediate I would hope I haven't crossed any lines that may appear to be extortion of any kind. I looked extortion up in the dictionary and it stated in the old law (England) that if you felt you were owed the money you were seeking - that it wasn't considered illegal. However, I in no way shape or form want to even appear that I am breaking this or any other law - old or new.

I guess I am going through a culture shock. Over the years the law has changed and U S citizens seem to have lost their civil rights. It is evident that the U S and state Governments lean in favor of corporations versus it's citizens. That isn't the way our forefathers intended it to be and I have a hard time accepting that. I still believe that I am entitled to the rights the U. S. Constitution guarantees me and others. I recently read that case law has determined that corporations are now also considered to be protected by the U S Constitution when it clearly states the citizens. So I am a little perplexed about the matter and what my rights are.

I am not familiar with every law and I want to be certain I am not violating the law in anyway. I have no intentions whatsoever to violate any state or federal laws of any kind. If you feel that I have taken liberties I shouldn't have, please inform me of any mistakes I have made. If I am under any kind of investigation from the powers that be, I'd like to be informed about that and advised accordingly.

I have sent you documents that I thought you should be aware of concerning my case and possible violations of law. If these matters don't concern you and you have no jurisdiction over the matter please inform me and I will stop sending them to you.

Gentlemen all I seek is justice. The law has been administered to me on several occasions and I'd like it to be fairly applied to everybody else as well. I get the feeling that the simple process of Justice is slowly slipping away and being replaced by something none of us would want. It is dawning on me that there is no Justice anymore.

I spent two years developing a trivia game about the History and Geography of the US and realized what a great country the United States of America is. Then I learned I had the right as a U S citizen to file lawsuits in federal court even if I was in jail and was amazed at our protections. I went overseas and realized how our citizens are respected by our government much more then citizens of other countries by their government. It really broadens your perspective and makes you appreciate what we have – the best nation in the world. It is a luxury we have simply because we were born here.

It seems to me that Thomas Jefferson was right when he said, *"Experience hath shown, that even the best forms [of government] those entrusted with power have, in time, and by slow operations, perverted it into tyranny."* I believe that lobbyist, lawyers, politicians and corporations are destroying this nation and the U S Constitution. I'm a little upset by this and my letters may be abrasive at times. I still believe in the U S Constitution and the rights it gives me. However be certain - that I don't intend to ever violate or even bend any laws of this great Nation.

If there is any way that you gentlemen could help me preserve justice and defend the U S Constitution I'd sure appreciate your help.

Thanking you in advance.

Constitutionally,

Dale B. Adams

REQUEST FOR A FORMAL INVESTIGATION

Hello,

Please find enclosed the Petition For Review that was presented to the Administrative Review Board of OSHA in Washington, DC.

Within these pages you will find numerous email, mail and fax transmissions I have sent to the U S Department of Labor requesting that they investigate Tyson Foods for violations of U S Labor laws relating to Fair Labor Standards and other violations of federal law committed by Tyson Foods Inc. Although I began contacting this agency prior to August of 2009 I still have received no response to my allegations from the Arkansas branch of the U S DOL. I request charges be filed against this agency for public corruption. Please also note that I have sent this agency a standard U S Form 95 to pursue legal redress for their deliberate neglect to abide by federal laws as well as their rules and regulations. A copy was mailed to the U S Secretary of Labor as well as to the OSHA Administrative Law Judges. You now have notice of my intent to sue this federal agency to satisfy the requirement to exhaust all remedies.

You will also find letters and email transmissions that were sent to the USDA since March of 2009 in reference to the USDA Rural Development approving a loan to my wife and passing inspection on this home although it doesn't meet building codes and is a fire and safety hazard that was brought to their attention. So far the only response we have gotten from this agency is that they aren't concerned with the matter and don't intend to show good faith and repair the home as we feel they are obligated to do so. Please also note that I have sent this agency a standard U S Form 95 to pursue legal redress for their deliberate neglect to abide by federal laws as well as their own rules and regulations. A copy was mailed to the USDA Central Processing, U S Secretary of Agriculture as well as to the Arkansas USDA State Director. I received no notification that they have received this document nor any response that they intend to remedy the situation displaying further negligence. You now have notice of my intent to sue this federal agency to satisfy the requirement to exhaust all remedies.

I also filed for a FOIA request to get documents about this home loan and property inspection but they have delayed releasing these documents and attempted to refuse to comply because I am not Cherie Gattis Adams who is my wife and we both live at this same location where I requested this information about. My wife then replied with a FOIA request and we haven't received a reply. The USDA is

violating federal law by retaliating against us to delay and deny our ability to pursue legal redress.

You will also find numerous letters and email transmissions sent to the USDA Food Safety Inspection Service related to filing charges against Tyson Foods Inc for their blatant disregard for food safety regulations and U S laws. Although I have received a few responses from the FOIA office, I haven't heard from the FSIS department about this investigation or if they are even pursuing this important matter.

I hereby request a formal investigation into both the U S Department of Labor and the USDA for public corruption. I believe both agencies have been compromised by Tyson Foods Inc using cronyism "old boy network," nepotism as well as bribery. Tyson Foods has a history of bribing government officials and it is doubtful that they have stopped this illegal activity because they have a blatant disregard for state and federal laws as well as USDA rules and regulations.

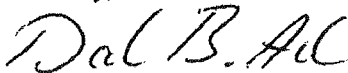

Please review this petition and all of the very serious violations of law it contains. These agencies are not showing due diligence and are negligent in their official and individual capacity to enforce and uphold the laws and protections it affords to the citizens of the United States of America. Their negligence can greatly affect the health and welfare of the citizens of this nation and due diligence should be exercised to investigate this matter.

Please also note that I have filed a complaint with the EEOC and have had to also send them a standard U S Form 95 stating my intention to pursue legal redress against this agency. You now have notice of my intent to sue this federal agency to satisfy the requirement to exhaust all remedies. Although they have recently taken some actions to remedy the situation they are now supposed to investigate Tyson Foods sometime in November. This agency has informed me that they have budgetary constraints and may not be investigating this matter with due diligence. The EEOC has special powers and prerogatives since these law violations were committed under the umbrella of the Sarbanes-Oxley Act and a SOX violation is pending. I therefore request a complete and thorough investigation into these violations of law and I want the criminals who violated federal law prosecuted to the full extent of the law. I don't believe the EEOC is even knowledgeable or familiar with these special powers of law they now have. Please advise them accordingly.

Please inform me that you have received this information and state your intentions to this formal request.

Thanking you in advance.

Kindly,

Dale B Adams

Exhibit F

regulations by investigating my family while I am exercising my 1st Amendment
Constitutional Rights

Section 215: Access to records and other items under FISA

FISA was modified by section 215 (Access to records and other items under the Foreign Intelligence Surveillance Act) to allow the Director of the FBI (or an official designated by the Director, so long as that official's rank is no lower than Assistant Special Agent in Charge) to apply for an order to produce materials that assist in an investigation undertaken to protect against international terrorism or clandestine intelligence activities. The act specifically gives an example to clarify what it means by "tangible things": it includes "books, records, papers, documents, and other items".

It is specified that any such investigation must be conducted in accordance with guidelines laid out in Executive Order 12333 (which pertains to United States intelligence activities). Investigations must also not be performed on U.S. citizens who are carrying out activities protected by the First Amendment to the Constitution of the United States.

6. Your Honor, I'm tired... A ... U S citizen shouldn't have to fight this hard to obtain his or her civil and Constitutional Rights?
7. I want my civil and Constitutional rights back – will you please help me?
